

## 2010 ROADSIDE VEGETATION MANAGEMENT PROGRAM

Woodlands County Agriculture Services will be carrying out its roadside vegetation management program once again this year.

**COMMENCING JUNE 14, 2010**

Landowners who do not wish to have the roadside adjacent to their property sprayed must complete a No Spray Agreement and put up No Spray signs **prior to May 31, 2010.**

Upon signing the No Spray Agreement, the Landowner accepts the responsibility for vegetation control along the road right of ways adjacent to their property. Landowners must carry out control prior to **August 1, 2010.** Agriculture Services will conduct inspections around the above dates to determine if control methods are satisfactory.

In cooperation with the landowners we can make our roadside vegetation management program an efficient and economical way of controlling the spread of weeds, and make our road system safer for the general public to drive on.
